**SNOOZINATOR**  
extendable snooze

# ICF-C275RC

## Auto Time Setting AM/FM Clock Radio with Digital Tuner

### features

- **New Appealing Design** new low profile design with easy-to-reach snooze button placement makes this high tech look an attractive addition to your nightstand or dresser
- **Auto Time-Setting Clock** receives highly accurate time signal being broadcast by a scientific reference transmitter and automatically sets the time and date; the settings are checked when the clock is plugged in, or whenever power is interrupted; settings are also repeatedly checked throughout the day to maintain consistent time accuracy down to fractions of a second
- **AM/FM Digital Tuning Radio Controlled Clock Radio** makes tuning-in a desired station simple and precise, with accurate drift-free tuning of AM and FM radio stations
- **Triple Time Display** current time, Alarm A and Alarm B are displayed continuously on the easy-to-read LCD display
- **Dual Alarm with Individual Setting** permits two separate wake-up settings, an especially useful feature for working couples, and can also display the current date
- **Melody Alarm** with 2 alarm melodies available
- ▲ **Extendable Snooze** (10 Minutes per Tap/60 Minutes Max) gives you the freedom to easily choose your own snooze time instead of being held captive by the short time interval of most other snooze timers; each press of the Snoozinator™ bar adds an additional 10 minutes to your total snooze time; up to a full hour of uninterrupted sleep will be your choice after the alarm first sounds, all with just a few quick flicks of your fingertip
- ▲ **Nap Timer** is a separate button which allows you to take a short nap and wake up buzzer without changing your alarm settings. (You can select your favorite nap time 10/20/30/60/90/120 minutes)
- **Brightness Control (H/M/L)** allows you to adjust the level of display brightness to suit your preference, in the day or night time
